

MineSweeper -- Help

MineSweeper is a deceptively simple test of memory and reasoning. The goal is to find the empty squares and avoid the mines.

MineSweeper Board

MineSweeper has a standard boards with 81 tiles and 10 mines.

Click “New Game” Button can start a new game. The “Bomb Number” Button shows the number of hidden mines .

How to play

The rules in MineSweeper are simple:

- Uncover a mine, and the game ends.
- Uncover an empty square, and you keep playing.
- Uncover a number, and it tells you how many mines are hidden in the eight surrounding squares.

Hints and tips

Mark the mines:

- If you suspect a square conceals a mine, right-click it. This puts a flag on the square.
- If you're not sure, right-click again to make it a question mark.
- If you feel that this square is not a mine, you can right-click again and it will make the square to be empty.
